

Cellular mast emissions survey

Living Legend

Document details

Document name	Cellular mast emissions survey	Living Legend
Survey date	22-09-2022 at 09:02:32	
Report issue date	17-10-2022	
Survey engineer	Louise Sands	
Report compiled by	Uthman Mahmood	
Checked and approved by	Bachir Belloul	
Authorised for distribution	Tom Bennett

1 Executive summary

The Jersey Competition and Regulatory Authority or JCRA regularly monitors emission levels from the cellular masts in Jersey¹ to ensure the mobile network operators who operate their services from those masts comply with their license obligations in terms of power levels and that the levels from the sites meet the internationally recognised standards and guidelines regarding health and safety limits for the public.

In 2017, JCRA commissioned EM emission level surveys at all the sites within the island. The surveys were repeated in each subsequent year for all new sites and sites where major changes were made by the operators in the previous year. This report presents the results of the survey conducted at the Living Legend site in 2022.

The Living Legend site was used by one operator at the time of the survey: JT. Surveys were conducted at all cellular frequency bands (800, 900, 1800, 2100 and 2600MHz) for all mobile cellular technologies (GSM, 3G and 4G) and for all three cellular operators as a routine procedure. Even though the reported levels are expected to be predominantly emitted from this site, the test equipment does not discriminate between nearby sites which means that the levels are cumulated over all site emissions detected by the test instrument.

The survey established that the emission levels around the site were very low and well below the safety limits for the public advised by internationally recognised standards.

The values shown hereafter are the maximum levels recorded around the site following a peak search. The levels were found to be lower at all the other locations round this site. The recorded values are true at the time of testing and can go up or down depending on the level of user activity on the site.

The total Exposure Quotient (EQ) for the site recorded across all detected cellular frequency bands is given at the bottom of the summary table below. A total EQ close to 1 (one) for the site would mean that emission levels approach the safety limit advised by ICNIRP in their guidelines.

Table 1 – Cumulative exposure quotient

Site Name	Band [MHz]	Max E-field in band [V/m]	Operator at Max E-field	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	800	0.06097	JT	638	1.37894E-05	1/ 72520
	900	2.825	JT	15	0.006797843	1/ 147
	1800	0.004204	Airtel	13876	3.94364E-07	1/ 2535730
	2100	0.006393	Airtel	9542	6.75973E-07	1/ 1479349
	2600	0.009573	JT	6372	1.81932E-06	1/ 549656
Total Site EQ					0.006814522	1/ 147

The results show that the total EQ was measured at 1/147 and therefore remains well below the ICNIRP guidelines.

The graphs which follow show the activity on all the frequency bands surveyed. The plots are colour-coded for easy identification of the three main operators: Airtel in red, Sure in dark blue, and Jersey Telecom in light blue. The graphs are also supported by the equivalent statistical figures derived from the measured levels at the site for added clarity.

¹ Prior to 1 July 2020, the JCRA and the Guernsey Competition Regulatory Authority coordinated their activities in the Channel Islands as the Channel Islands Competition Regulatory Authorities (CICRA). Earlier reports may refer to CICRA rather than JCRA.

2 Site details

2.1 Site location

Figure 1 – Map of the site area

Site name:	Living Legend
Site address:	La Rue du Petit l'Aleval, St Peter, Jersey
Site latitude:	49.219815
Site longitude:	-2.166699

2.2 Site description

Operators:	JT
Antenna types:	Omni-Directional
Approximate height:	8m
Site type:	Monopole
Description:	The antennas is located on top of the pole. Public access to the antenna is not possible without climbing aid.

2.3 Site photo

Figure 2 – Location of the peak and where emission levels were measured

2.4 Test location

Figure 3 – Survey area with spot measurement markers

The red heart pin is the site location, the green flag pins are intermediate locations measured at during the peak search and the yellow star pin is the spot where the highest spot search reading was obtained and where the detailed survey was carried out.

As part of the peak search procedure, spot measurements were taken at locations around the antennas as shown on the above sketch. The reported spectrum scans were taken at the peak location (shown in red above) where the highest readings were recorded. The spectrum readings reported further down this report were recorded over a period of six minutes as advised by ICNIRP.

3 Survey results

3.1 800MHz band

The graph for the 800MHz activity is shown below with the E-field strength levels measured at the site plotted on a logarithmic scale.

Figure 4 – 800MHz band spectrum scan

The red line on the scan represents the Airtel activity, the light blue is JT and the dark blue is Sure. ICNIRP's reference level for the *General Public* is also shown as the straight dashed line at the top of the graph. For clarity, each step on the vertical axis represents a 10-fold increase. The same scaling and colour scheme will be used throughout this report.

No field level recorded across the band was higher than 0.06 V/m (JT), which is 638 times smaller than the ICNIRP Guideline Reference Level.

Table 2 – 800MHz band exposure quotient at Living Legend

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	Airtel	800	0.004075	9544	1.45176E-07	1/ 6888214
	JT		0.06097	638	1.34595E-05	1/ 74297
	Sure		0.007215	5390	1.84735E-07	1/ 5413167
total band EQ					1.37894E-05	1/ 72520

3.2 900MHz band

The graph for the 900MHz activity is shown below.

Figure 5 – 900MHz band spectrum scan

No field level recorded across the band was higher than 2.825 V/m (JT), which is 15 times smaller than the ICNIRP Guideline Reference Level.

The EQ results for the 900MHz band are shown below.

Table 3 – 900MHz band exposure quotient at Living Legend

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	Airtel	900	0.004428	9316	1.71144E-07	1/ 5843049
	JT		2.825	15	0.006797544	1/ 147
	Sure		0.003781	10910	1.27303E-07	1/ 7855285
total band EQ					0.006797843	1/ 147

3.3 1800MHz band

The graph for the 1800MHz activity around the site is shown below.

Figure 6 – 1800MHz spectrum scan

No activity was recorded in the 1800MHz at this site.

The EQ results for the 1800MHz band are shown below.

Table 4 – 1800MHz band exposure quotient at Living Legend

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	Airtel	1800	0.004204	13876	1.26114E-07	1/ 7929339
	JT		0.00392	14882	1.41978E-07	1/ 7043360
	Sure		0.003499	16672	1.26272E-07	1/ 7919402
total band EQ					3.94364E-07	1/ 2535730

3.4 2100MHz band

The graph for the 2100MHz band activity around the site is shown below.

Figure 7 – 2100MHz band spectrum scan

No activity was recorded in the 2100MHz band at this site.

The EQ results for the 2100MHz band are shown below.

Table 5 – 2100MHz band exposure quotient at Living Legend

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	Airtel	2100	0.006393	9542	1.85113E-07	1/ 5402099
	JT		0.005607	10879	1.79015E-07	1/ 5586129
	Sure		0.006271	9727	1.62204E-07	1/ 6165078
	Clear		0.005541	11009	1.49641E-07	1/ 6682660
total band EQ					6.75973E-07	1/ 1479349

3.5 2600MHz band

The graph for the 2600MHz band activity around the site is shown below.

Figure 8 – 2600MHz band spectrum scan

No activity was recorded in the 2600MHz band at this site.

The EQ results for the 2600MHz band are shown below.

Table 6 – 2600MHz band exposure quotient at Living Legend

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Living Legend	Airtel	2600	0.009509	6415	6.7148E-07	1/ 1489247
	JT		0.009573	6372	5.85859E-07	1/ 1706897
	Sure		0.009375	6507	5.61981E-07	1/ 1779418
total band EQ					1.81932E-06	1/ 549656

END
