

Cellular mast emissions survey: Hue Court

Document details

Document name	Cellular mast emissions survey: Hue Court
Survey date	12-09-2024 at 16:45
Report issue date	18-09-2024
Survey engineer	Aleem Alvi
Report compiled by	Fatima Tuz Zehra
Checked and approved by	Bachir Belloul

1 Executive summary

The Jersey Competition and Regulatory Authority or JCRA regularly monitors emission levels from the cellular masts in Jersey¹ to ensure the mobile network operators who operate their services from those masts comply with their license obligations in terms of power levels and that the levels from the sites meet the internationally recognised standards and guidelines regarding health and safety limits for the public.

In 2017, JCRA commissioned EM emission level surveys at all the sites within the island. The surveys were repeated in each subsequent year for all new sites and sites where major changes were made by the operators in the previous year. This report presents the results of the survey conducted at the Hue Court site in 2024.

The Hue Court site was used by all 3 operators at the time of the survey: Airtel, JT and Sure. Surveys were conducted at all cellular frequency bands (800, 900, 1800, 2100 and 2600MHz) for all mobile cellular technologies (GSM, 3G and 4G) and for all three cellular operators as a routine procedure. Even though the reported levels are expected to be predominantly emitted from this site, the test equipment does not discriminate between nearby sites which means that the levels are cumulated over all site emissions detected by the test instrument.

The survey established that the emission levels around the site were very low and well below the safety limits for the public advised by internationally recognised standards.

The values shown hereafter are the maximum levels recorded around the site following a peak search. The levels were found to be lower at all the other locations round this site. The recorded values are true at the time of testing and can go up or down depending on the level of user activity on the site.

The total Exposure Quotient (EQ) for the site recorded across all detected cellular frequency bands is given at the bottom of the summary table below. A total EQ close to 1 (one) for the site would mean that emission levels approach the safety limit advised by ICNIRP in their guidelines.

Table 1 – Cumulative exposure quotient

Site Name	Band [MHz]	Max E-field in band [V/m]	Operator at Max E-field	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	800	0.1519	Airtel	256	0.000886521	1/ 1128
	900	0.3021	JT	137	0.000423723	1/ 2360
	1800	0.2123	Sure	275	0.001090168	1/ 917
	2100	0.06468	JT	943	5.25097E-05	1/ 19044
	2600	0.2966	Sure	206	0.001035229	1/ 966
Total Site EQ					0.003488149	1/ 287

The results show that the total EQ was measured at 1/287 and therefore remains below the ICNIRP guidelines.

The graphs which follow show the activity on all the frequency bands surveyed. The plots are colour-coded for easy identification of the three main operators: Airtel in red, Sure in dark blue, and Jersey Telecom in light blue. The graphs are also supported by the equivalent statistical figures derived from the measured levels at the site for added clarity.

¹ Prior to 1 July 2020, the JCRA and the Guernsey Competition & Regulatory Authority coordinated their activities in the Channel Islands as the Channel Islands Competition Regulatory Authorities (CICRA). Earlier reports may refer to CICRA rather than JCRA.

2 Site details

2.1 Site location

Figure 1 – Map of the site area

Site name:	Hue Court
Site address:	5-49 Hue Court, Hue Street
Site latitude:	49.18618
Site longitude:	-2.10851

2.2 Site description

Operators:	Airtel, JT and Sure
Antenna types:	Directional Antenna
Approximate height:	34m
Site type:	Rooftop
Description:	The antennas at Hue Court are installed on the rooftop of the building. Public access to the rooftop is restricted.

2.3 Site photo

Figure 2 – Location of the peak where emission levels were measured.

2.4 Test location

Figure 3 – Survey area with spot measurement markers

As part of the peak search procedure, spot measurements were taken at locations around the antennas as shown on the above sketch.

The blue triangle is the antenna location, yellow lines are the walk route, the green circles are intermediate locations measured at during the peak search and the red circle is the spot where the highest spot search reading was obtained and where the detailed survey was carried out.

The spectrum readings reported further down this report were recorded over a period of six minutes as advised by ICNIRP.

3 Survey results

3.1 800MHz band

The graph for the 800MHz activity is shown below with the E-field strength levels measured at the site plotted on a logarithmic scale.

Figure 4 – 800MHz band spectrum scan

The red line on the scan represents the Airtel activity, the light blue is JT and the dark blue is Sure. ICNIRP's *General Public* Reference level is also shown as the straight dashed line at the top of the graph. For clarity, each step on the vertical axis represents a 10-fold increase. The same scaling and colour scheme will be used throughout this report.

No field level recorded across the band was higher than 0.1519 V/m (Airtel), which is 256 times smaller than the ICNIRP Reference Level.

Table 2 – 800MHz band exposure quotient at Hue Court

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	Airtel	800	0.1519	256	0.000334022	1/ 2994
	JT		0.1256	310	0.000299784	1/ 3336
	Sure		0.1355	287	0.000252715	1/ 3957
total band EQ					0.000886521	1/ 1128

3.2 900MHz band

The graph for the 900MHz activity is shown below.

Figure 5 – 900MHz band spectrum scan

No field level recorded across the band was higher than 0.3021 V/m (JT), which is 137 times smaller than the ICNIRP Reference Level.

The EQ results for the 900MHz band are shown below.

Table 3 – 900MHz band exposure quotient at Hue Court

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	Airtel	900	0.1111	371	7.83933E-05	1/ 12756
	JT		0.3021	137	0.000256962	1/ 3892
	Sure		0.09999	413	8.8367E-05	1/ 11316
total band EQ					0.000423723	1/ 2360

3.3 1800MHz band

The graph for the 1800MHz activity around the site is shown below.

Figure 6 – 1800MHz spectrum scan

No field level recorded across the band was higher than 0.2123 V/m (Sure), which is 275 times smaller than the ICNIRP Reference Level.

The EQ results for the 1800MHz band are shown below.

Table 4 – 1800MHz band exposure quotient at Hue Court

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	Airtel	1800	0.2043	286	0.000408492	1/ 2448
	JT		0.1013	576	0.000149493	1/ 6689
	Sure		0.2123	275	0.000532182	1/ 1879
total band EQ					0.001090168	1/ 917

3.4 2100MHz band

The graph for the 2100MHz band activity around the site is shown below.

Figure 7 – 2100MHz band spectrum scan

No field level recorded across the band was higher than 0.06468 V/m (JT), which is 943 times smaller than the ICNIRP Reference Level.

The EQ results for the 2100MHz band are shown below.

Table 5 – 2100MHz band exposure quotient at Hue Court

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	Airtel	2100	0.04856	1256	9.54645E-06	1/ 104751
	Clear		0.00585	10427	1.66149E-07	1/ 6018695
	JT		0.06468	943	4.13625E-05	1/ 24176
	Sure		0.01549	3938	1.43455E-06	1/ 697084
total band EQ					5.25097E-05	1/ 19044

3.5 2600MHz band

The graph for the 2600MHz band activity around the site is shown below.

Figure 8 – 2600MHz band spectrum scan

No field level recorded across the band was higher than 0.2966 V/m (Sure), which is 206 times smaller than the ICNIRP Reference Level.

The EQ results for the 2600MHz band are shown below.

Table 6 – 2600MHz band exposure quotient at Hue Court

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Hue Court	Airtel	2600	0.00833	7323	7.07667E-07	1/ 1413094
	JT		0.05574	1094	4.24846E-05	1/ 23538
	Sure		0.2966	206	0.000992037	1/ 1008
total band EQ					0.001035229	1/ 966

END
