

Cellular mast emissions survey: Le Maistre Bros

Document details

Document name	Cellular mast emissions survey:	Le Maistre Bros
Survey date	13-09-2024 at 11:36	
Report issue date	24-09-2024	
Survey engineer	Aleem Alvi	
Report compiled by	Fatima Tuz Zehra	
Checked and approved by	Bachir Belloul

1 Executive summary

The Jersey Competition and Regulatory Authority or JCRA regularly monitors emission levels from the cellular masts in Jersey¹ to ensure the mobile network operators who operate their services from those masts comply with their license obligations in terms of power levels and that the levels from the sites meet the internationally recognised standards and guidelines regarding health and safety limits for the public.

In 2017, JCRA commissioned EM emission level surveys at all the sites within the island. The surveys were repeated in each subsequent year for all new sites and sites where major changes were made by the operators in the previous year. This report presents the results of the survey conducted at the Le Maistre Bros site in 2024.

The Le Maistre Bros site was used by a single operator at the time of the survey: JT. Surveys were conducted at all cellular frequency bands (800, 900, 1800, 2100 and 2600MHz) for all mobile cellular technologies (GSM, 3G and 4G) and for all three cellular operators as a routine procedure. Even though the reported levels are expected to be predominantly emitted from this site, the test equipment does not discriminate between nearby sites which means that the levels are cumulated over all site emissions detected by the test instrument.

The survey established that the emission levels around the site were very low and well below the safety limits for the public advised by internationally recognised standards.

The values shown hereafter are the maximum levels recorded around the site following a peak search. The levels were found to be lower at all the other locations round this site. The recorded values are true at the time of testing and can go up or down depending on the level of user activity on the site.

The total Exposure Quotient (EQ) for the site recorded across all detected cellular frequency bands is given at the bottom of the summary table below. A total EQ close to 1 (one) for the site would mean that emission levels approach the safety limit advised by ICNIRP in their guidelines.

Table 1 – Cumulative exposure quotient

Site Name	Band [MHz]	Max E-field in band [V/m]	Operator at Max E-field	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	800	0.3523	JT	110	0.001579956	1/ 633
	900	2.99	JT	14	0.011016976	1/ 91
	1800	0.1682	JT	347	0.000329942	1/ 3031
	2100	0.03352	Sure	1820	9.41157E-06	1/ 106252
	2600	0.01695	Airtel	3599	8.61541E-06	1/ 116071
Total Site EQ					0.012944902	1/ 77

The results show that the total EQ was measured at 1/77 and therefore remains below the ICNIRP guidelines.

The graphs which follow show the activity on all the frequency bands surveyed. The plots are colour-coded for easy identification of the three main operators: Airtel in red, Jersey Telecom in light blue and Sure in dark blue. The graphs are also supported by the equivalent statistical figures derived from the measured levels at the site for added clarity.

¹ Prior to 1 July 2020, the JCRA and the Guernsey Competition & Regulatory Authority coordinated their activities in the Channel Islands as the Channel Islands Competition Regulatory Authorities (CICRA). Earlier reports may refer to CICRA rather than JCRA.

2 Site details

2.1 Site location

Figure 1 – Map of the site area

Site name:	Le Maistre Bros
Site address:	La Rue de la Piece Mauger
Site latitude:	49.22628
Site longitude:	-2.07091

2.2 Site description

Operators:	JT
Antenna types:	Monopole
Approximate height:	9m
Site type:	Monopole
Description:	The antenna at Le Maistre Bros is a monopole. Access to the antenna requires use of a climbing aid.

2.3 Site photo

Figure 2 – Location of the peak where emission levels were measured.

2.4 Test location

Figure 3 – Survey area with spot measurement markers

As part of the peak search procedure, spot measurements were taken at locations around the antennas as shown on the above sketch.

The blue triangle is the antenna location, yellow lines are the walk route, the green circles are intermediate locations measured at during the peak search and the red circle is the spot where the highest spot search reading was obtained and where the detailed survey was carried out.

The spectrum readings reported further down this report were recorded over a period of six minutes as advised by ICNIRP.

3 Survey results

3.1 800MHz band

The graph for the 800MHz activity is shown below with the E-field strength levels measured at the site plotted on a logarithmic scale.

Figure 4 – 800MHz band spectrum scan

The red line on the scan represents the Airtel activity, the light blue is JT and the dark blue is Sure. ICNIRP's *General Public* Reference level is also shown as the straight dashed line at the top of the graph. For clarity, each step on the vertical axis represents a 10-fold increase. The same scaling and colour scheme will be used throughout this report.

No field level recorded across the band was higher than 0.3523 V/m (JT), which is 110 times smaller than the ICNIRP Reference Level.

Table 2 – 800MHz band exposure quotient at Le Maistre Bros

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	Airtel	800	0.01103	3526	1.7403E-06	1/ 574615
	JT		0.3523	110	0.001528235	1/ 654
	Sure		0.05996	649	4.99806E-05	1/ 20008
total band EQ					0.001579956	1/ 633

3.2 900MHz band

The graph for the 900MHz activity is shown below.

Figure 5 – 900MHz band spectrum scan

No field level recorded across the band was higher than 2.99 V/m (JT), which is 14 times smaller than the ICNIRP Reference Level.

The EQ results for the 900MHz band are shown below.

Table 3 – 900MHz band exposure quotient at Le Maistre Bros

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	Airtel	900	0.008565	4816	8.01765E-07	1/ 1247248
	JT		2.99	14	0.010962949	1/ 91
	Sure		0.2372	174	5.32254E-05	1/ 18788
total band EQ					0.011016976	1/ 91

3.3 1800MHz band

The graph for the 1800MHz activity around the site is shown below.

Figure 6 – 1800MHz spectrum scan

No field level recorded across the band was higher than 0.1682 V/m (JT), which is 347 times smaller than the ICNIRP Reference Level.

The EQ results for the 1800MHz band are shown below.

Table 4 – 1800MHz band exposure quotient at Le Maistre Bros

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	Airtel	1800	0.007768	7510	6.2053E-07	1/ 1611525
	JT		0.1682	347	0.000326708	1/ 3061
	Sure		0.02322	2512	2.61353E-06	1/ 382624
total band EQ					0.000329942	1/ 3031

3.4 2100MHz band

The graph for the 2100MHz band activity around the site is shown below.

Figure 7 – 2100MHz band spectrum scan

No field level recorded across the band was higher than 0.03352 V/m (Sure), which is 1820 times smaller than the ICNIRP Reference Level.

The EQ results for the 2100MHz band are shown below.

Table 5 – 2100MHz band exposure quotient at Le Maistre Bros

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	Airtel	2100	0.0105	5810	8.8251E-07	1/ 1133132
	Clear		0.01206	5058	6.94929E-07	1/ 1438996
	JT		0.01136	5370	9.38323E-07	1/ 1065731
	Sure		0.03352	1820	6.89581E-06	1/ 145016
total band EQ					9.41157E-06	1/ 106252

3.5 2600MHz band

The graph for the 2600MHz band activity around the site is shown below.

Figure 8 – 2600MHz band spectrum scan

No meaningful activity was recorded at this site on the 2600MHz band. The EQ results for the band are shown below.

Table 6 – 2600MHz band exposure quotient at Le Maistre Bros

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Le Maistre Bros	Airtel	2600	0.01695	3599	2.9685E-06	1/ 336870
	JT		0.01556	3920	2.88117E-06	1/ 347081
	Sure		0.01613	3782	2.76574E-06	1/ 361566
total band EQ					8.61541E-06	1/ 116071

END
