1 Executive summary

The Jersey Competition and Regulatory Authority or JCRA regularly monitors emission levels from the cellular masts in Jersey¹ to ensure the mobile network operators who operate their services from those masts comply with their license obligations in terms of power levels and that the levels from the sites meet the internationally recognised standards and guidelines regarding health and safety limits for the public.

In 2017, the JCRA commissioned surveys to measure the electromagnetic field (EMF) emission levels at all the sites hosting mobile telecommunication equipment within the island. Further surveys have been conducted in each subsequent year focussing on new sites, those where significant changes have been made by the operators or those where the public have raised concerns to the JCRA in the previous year. This report presents the results of the survey conducted at the Les Fontaines site in 2025.

In 2025, the Jersey mobile network operators have launched their first commercial 5G services. This year's audits therefore include the frequency bands used for 5G, noting however that not all sites currently have 5G transmitting equipment.

The Les Fontaines site was used by a single operator at the time of the survey: JT. Surveys were conducted at all cellular frequency bands (700, 800, 900, 1800, 2100, 2600 and 3400MHz) for all mobile cellular technologies (2G, 3G, 4G and 5G) and for all three cellular operators as a routine procedure. Even though the reported levels are expected to be predominantly emitted from this site, the test equipment does not discriminate between nearby sites which means that the levels are cumulated over all site emissions detected by the test instrument.

The survey established that the emission levels around the site were very low and well below the safety limits for the public advised by internationally recognised standards.

The values shown hereafter are the maximum levels recorded around the site following a peak search. The levels were found to be lower at all the other locations round this site. The recorded values are true at the time of testing and can go up or down depending on the level of user activity on the site.

The total Exposure Quotient (EQ) for the site recorded across all detected cellular frequency bands is given at the bottom of the summary table below. A total EQ close to 1 (one) for the site would mean that emission levels approach the safety limit advised by ICNIRP in their guidelines.

Table 1 – Total EQ by frequency band

Site Name	Band [MHz]	Max E-field in band [V/m]	Operator at Max E-field	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	700	0.4735	JT	82	0.001703903	1/ 587
	800	0.2616	JT	149	0.000233936	1/ 4275
	900	1.011	JT	41	0.000626483	1/ 1596
	1800	0.003679	Sure	15857	1.99298E-07	1/ 5017615
	2100	0.00291	Sure	20962	1.69223E-07	1/ 5909356
	2600	0.002435	Airtel	25051	2.17396E-07	1/ 4599909
	3400	0.003261	JT	11926	5.45657E-07	1/ 1832653
Total Site EQ					0.002565454	1/ 390

¹ Prior to 1 July 2020, the JCRA and the Guernsey Competition & Regulatory Authority coordinated their activities in the Channel Islands as the Channel Islands Competition Regulatory Authorities (CICRA). Earlier reports may refer to CICRA rather than JCRA.

The results show that the total EQ was measured at 0.256% of ICNIRP's *General Public* Reference Levels (or about 1/390) and the site therefore remains safe.

The graphs which follow show the activity on all the frequency bands surveyed. The plots are colour-coded for easy identification of the operator. On each plot, the solid red line represents the Airtel activity, the light blue is JT, the dark blue is Sure, the light grey is Clear (Clear only operates in the 2100MHz band) and the green line is Newtel (Newtel only operates a license in the 3400MHz band). Note however that not all operators are present in each frequency band but the colour assigned to each operator remains the same throughout.

ICNIRP's *General Public* Reference Level is also shown as the dashed line at the top of the graphs. For clarity, each step on the vertical axis represents a 10-fold increase. The same scaling and colour scheme will be used on the plots throughout this report.

The graphs are also supported by the equivalent statistical tables derived from the measured levels at the site for added clarity.

2 Site details

2.1 Site location

Figure 1 – Map of the site area

Site name:	Les Fontaines
Site address:	La Route du Nord
Site latitude:	49.25587
Site longitude:	-2.14799

2.2 Site description

Operators:	JT
Antenna types:	Monopole Mast
Approximate height:	7m
Site type:	Monopole
Description:	The antenna at the La Fontaine Kiosk is installed next to the kiosk.

2.3 Site photo

Figure 2 – Location of the peak where emission levels were measured.

2.4 Test location

Figure 3 – Survey area with spot measurement markers

As part of the peak search procedure, spot measurements were taken at locations around the antennas as shown on the above sketch.

The blue triangle is the antenna location, yellow lines are the walk route, the green circles are intermediate locations measured at during the peak search and the red circle is the spot where the highest spot search reading was obtained and where the detailed survey was carried out.

The spectrum readings reported further down this report were recorded over a period of six minutes as advised by ICNIRP.

3 Survey results

3.1 700MHz band

The graph for the 700MHz activity is shown below with the E-field strength levels measured at the site plotted on a logarithmic scale.

Figure 4 – 700MHz band spectrum scan

No field level recorded across the band was higher than 0.4735 V/m (JT), which is 82 times smaller than the ICNIRP Reference Level.

The EQ results for the 700MHz band are shown below.

Table 2 – 700MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	JT	700	0.4735	82	0.001703533	1/ 587
	Sure		0.00465	8364	3.69633E-07	1/ 2705386
	total band EQ					0.001703903

3.2 800MHz band

The graph for the 800MHz activity is shown below.

Figure 5 – 800MHz band spectrum scan

No field level recorded across the band was higher than 0.2616 V/m (JT), which is 149 times smaller than the ICNIRP Reference Level.

The EQ results for the 800MHz band are shown below.

Table 3 – 800MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Airtel	800	0.006345	6129	4.84352E-07	1/ 2064613
	JT		0.2616	149	0.000232241	1/ 4306
	Sure		0.009193	4230	1.2105E-06	1/ 826102
total band EQ					0.000233936	1/ 4275

3.3 900MHz band

The graph for the 900MHz activity is shown below.

Figure 6 – 900MHz band spectrum scan

No field level recorded across the band was higher than 1.011 V/m (JT), which is 41 times smaller than the ICNIRP Reference Level.

The EQ results for the 900MHz band are shown below.

Table 4 – 900MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Airtel	900	0.005104	8082	2.61031E-07	1/ 3830957
	JT		1.011	41	0.000625397	1/ 1599
	Sure		0.02058	2004	8.25644E-07	1/ 1211176
total band EQ					0.000626483	1/ 1596

3.4 1800MHz band

The graph for the 1800MHz activity around the site is shown below.

Figure 7 – 1800MHz spectrum scan

No field level recorded across the band was higher than 0.003679 V/m (Sure), which is 15857 times smaller than the ICNIRP Reference Level.

The EQ results for the 1800MHz band are shown below.

Table 5 – 1800MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Airtel	1800	0.001964	29703	5.11765E-08	1/ 19540219
	JT		0.002182	26735	5.3127E-08	1/ 18822836
	Sure		0.003679	15857	9.49944E-08	1/ 10526934
total band EQ					1.99298E-07	1/ 5017615

3.5 2100MHz band

The graph for the 2100MHz band activity around the site is shown below.

Figure 8 – 2100MHz band spectrum scan

No meaningful activity was recorded at this site on the 2100MHz band. The EQ results for the band are shown below.

Table 6 – 2100MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Airtel	2100	0.002142	28478	4.47857E-08	1/ 22328552
	Clear		0.002129	28652	2.87414E-08	1/ 34792984
	JT		0.002186	27905	4.41418E-08	1/ 22654253
	Sure		0.00291	20962	5.15542E-08	1/ 19397050
total band EQ					1.69223E-07	1/ 5909356

3.6 2600MHz band

The graph for the 2600MHz band activity around the site is shown below.

Figure 9 – 2600MHz band spectrum scan

No meaningful activity was recorded at this site in the 2600MHz band. The EQ results for the band are shown below.

Table 7 – 2600MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Airtel	2600	0.002435	25051	7.70994E-08	1/ 12970268
	JT		0.002344	26024	7.30001E-08	1/ 13698606
	Sure		0.00226	26991	6.72961E-08	1/ 14859704
total band EQ					2.17396E-07	1/ 4599909

3.7 3400MHz band

The graph for the 3400-3800MHz band activity around the site is shown below.

Figure 10 – 3400MHz band spectrum scan

No meaningful activity was recorded at this site in the 3400MHz band. The EQ results for the band are shown below.

Table 8 – 3400MHz band exposure quotient at Les Fontaines

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Les Fontaines	Newtel	3400	0.002817	13806	9.97998E-08	1/ 10020063
	JT		0.003261	11926	2.14127E-07	1/ 4670118
	Sure		0.002924	13301	2.3173E-07	1/ 4315371
total band EQ					5.45657E-07	1/ 1832653

END
