1 Executive summary

The Jersey Competition and Regulatory Authority or JCRA regularly monitors emission levels from the cellular masts in Jersey¹ to ensure the mobile network operators who operate their services from those masts comply with their license obligations in terms of power levels and that the levels from the sites meet the internationally recognised standards and guidelines regarding health and safety limits for the public.

In 2017, the JCRA commissioned surveys to measure the electromagnetic field (EMF) emission levels at all the sites hosting mobile telecommunication equipment within the island. Further surveys have been conducted in each subsequent year focussing on new sites, those where significant changes have been made by the operators or those where the public have raised concerns to the JCRA in the previous year. This report presents the results of the survey conducted at the Trinity Hill Kiosk site in 2025.

In 2025, the Jersey mobile network operators have launched their first commercial 5G services. This year's audits therefore include the frequency bands used for 5G, noting however that not all sites currently have 5G transmitting equipment.

The Trinity Hill Kiosk site was used by a single operator at the time of the survey: JT. Surveys were conducted at all cellular frequency bands (700, 800, 900, 1800, 2100, 2600 and 3400MHz) for all mobile cellular technologies (2G, 3G, 4G and 5G) and for all three cellular operators as a routine procedure. Even though the reported levels are expected to be predominantly emitted from this site, the test equipment does not discriminate between nearby sites which means that the levels are cumulated over all site emissions detected by the test instrument.

The survey established that the emission levels around the site were low and remain below the safety limits for the public advised by internationally recognised standards.

The values shown hereafter are the maximum levels recorded around the site following a peak search. The levels were found to be lower at all the other locations round this site. The recorded values are true at the time of testing and can go up or down depending on the level of user activity on the site.

The total Exposure Quotient (EQ) for the site recorded across all detected cellular frequency bands is given at the bottom of the summary table below. A total EQ close to 1 (one) for the site would mean that emission levels approach the safety limit advised by ICNIRP in their guidelines.

Table 1 – Total EQ by frequency band

Site Name	Band [MHz]	Max E-field in band [V/m]	Operator at Max E-field	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	700	0.01269	JT	3065	4.87803E-06	1/ 205001
	800	0.09399	Sure	414	0.000103448	1/ 9667
	900	6.06	JT	7	0.050025952	1/ 20
	1800	0.03733	Sure	1563	1.36135E-05	1/ 73457
	2100	0.04002	Sure	1524	6.66939E-06	1/ 149939
	2600	0.006403	JT	9527	1.3959E-06	1/ 716384
	3400	0.007698	Sure	5052	3.32302E-06	1/ 300931
Total Site EQ					0.050159279	1/ 20

¹ Prior to 1 July 2020, the JCRA and the Guernsey Competition & Regulatory Authority coordinated their activities in the Channel Islands as the Channel Islands Competition Regulatory Authorities (CICRA). Earlier reports may refer to CICRA rather than JCRA.

The results show that the total EQ was measured at 5.01% of ICNIRP's *General Public* Reference Levels (or about 1/20) and the site therefore remains safe.

The graphs which follow show the activity on all the frequency bands surveyed. The plots are colour-coded for easy identification of the operator. On each plot, the solid red line represents the Airtel activity, the light blue is JT, the dark blue is Sure, the light grey is Clear (Clear only operates in the 2100MHz band) and the green line is Newtel (Newtel only operates a license in the 3400MHz band). Note however that not all operators are present in each frequency band but the colour assigned to each operator remains the same throughout.

ICNIRP's *General Public* Reference Level is also shown as the dashed line at the top of the graphs. For clarity, each step on the vertical axis represents a 10-fold increase. The same scaling and colour scheme will be used on the plots throughout this report.

The graphs are also supported by the equivalent statistical tables derived from the measured levels at the site for added clarity.

2 Site details

2.1 Site location

Figure 1 – Map of the site area

Site name:	Trinity Hill Kiosk
Site address:	Le Mont de la Trinite
Site latitude:	49.1947139
Site longitude:	-2.1015423

2.2 Site description

Operators:	JT
Antenna types:	Omni Directional Antenna
Approximate height:	2m
Site type:	Kiosk
Description:	The antenna at the Trinity Hill Kiosk is hidden inside the roof space of the kiosk. It is not visible to the public but its outer protective case can be reached by the public.

2.3 Site photo

Figure 2 – Location of the peak where emission levels were measured.

2.4 Test location

Figure 3 – Survey area with spot measurement markers

As part of the peak search procedure, spot measurements were taken at locations around the antennas as shown on the above sketch.

The blue triangle is the antenna location, yellow lines are the walk route, the green circles are intermediate locations measured at during the peak search and the red circle is the spot where the highest spot search reading was obtained and where the detailed survey was carried out.

The spectrum readings reported further down this report were recorded over a period of six minutes as advised by ICNIRP.

3 Survey results

3.1 700MHz band

The graph for the 700MHz activity is shown below with the E-field strength levels measured at the site plotted on a logarithmic scale.

Figure 4 – 700MHz band spectrum scan

No meaningful activity was recorded at this site on the 700MHz band. The EQ results for the band are shown below.

Table 2 – 700MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	JT	700	0.01269	3065	2.55985E-06	1/ 390648
	Sure		0.01185	3282	2.31818E-06	1/ 431373
	total band EQ					4.87803E-06

3.2 800MHz band

The graph for the 800MHz activity is shown below.

Figure 5 – 800MHz band spectrum scan

No field level recorded across the band was higher than 0.09399 V/m (Sure), which is 414 times smaller than the ICNIRP Reference Level.

The EQ results for the 800MHz band are shown below.

Table 3 – 800MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Airtel	800	0.01215	3201	2.43572E-06	1/ 410557
	JT		0.01157	3361	2.37818E-06	1/ 420490
	Sure		0.09399	414	9.86337E-05	1/ 10139
total band EQ					0.000103448	1/ 9667

3.3 900MHz band

The graph for the 900MHz activity is shown below.

Figure 6 – 900MHz band spectrum scan

No field level recorded across the band was higher than 6.06 V/m (JT), which is 7 times smaller than the ICNIRP Reference Level.

The EQ results for the 900MHz band are shown below.

Table 4 – 900MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Airtel	900	0.009584	4304	1.33398E-06	1/ 749638
	JT		6.06	7	0.050005772	1/ 20
	Sure		0.1348	306	1.88458E-05	1/ 53062
	total band EQ				0.050025952	1/ 20

3.4 1800MHz band

The graph for the 1800MHz activity around the site is shown below.

Figure 7 – 1800MHz spectrum scan

No field level recorded across the band was higher than 0.03733 V/m (Sure), which is 1563 times smaller than the ICNIRP Reference Level.

The EQ results for the 1800MHz band are shown below.

Table 5 – 1800MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Airtel	1800	0.004721	12357	3.24301E-07	1/ 3083557
	JT		0.006292	9272	4.23382E-07	1/ 2361933
	Sure		0.03733	1563	1.28658E-05	1/ 77725
total band EQ					1.36135E-05	1/ 73457

3.5 2100MHz band

The graph for the 2100MHz band activity around the site is shown below.

Figure 8 – 2100MHz band spectrum scan

No field level recorded across the band was higher than 0.04002 V/m (Sure), which is 1524 times smaller than the ICNIRP Reference Level.

The EQ results for the 2100MHz band are shown below.

Table 6 – 2100MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Airtel	2100	0.005022	12147	2.46829E-07	1/ 4051380
	Clear		0.005235	11652	1.75251E-07	1/ 5706086
	JT		0.007918	7704	4.41126E-07	1/ 2266926
	Sure		0.04002	1524	5.80618E-06	1/ 172230
total band EQ					6.66939E-06	1/ 149939

3.6 2600MHz band

The graph for the 2600MHz band activity around the site is shown below.

Figure 9 – 2600MHz band spectrum scan

No meaningful activity was recorded at this site in the 2600MHz band. The EQ results for the band are shown below.

Table 7 – 2600MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Airtel	2600	0.006327	9641	4.86987E-07	1/ 2053445
	JT		0.006403	9527	4.67433E-07	1/ 2139344
	Sure		0.00595	10252	4.4148E-07	1/ 2265109
total band EQ					1.3959E-06	1/ 716384

3.7 3400MHz band

The graph for the 3400-3800MHz band activity around the site is shown below.

Figure 10 – 3400MHz band spectrum scan

No meaningful activity was recorded at this site in the 3400MHz band. The EQ results for the band are shown below.

Table 8 – 3400MHz band exposure quotient at Trinity Hill

Site Name	Operator	Band [MHz]	Max E-field Strength [V/m]	ICNIRP Limit Relative to Max E-field	Band Exposure Quotient	Band EQ Relative to ICNIRP
Trinity Hill Kiosk	Newtel	3400	0.007175	5420	6.05013E-07	1/ 1652856
	JT		0.006995	5560	1.28535E-06	1/ 777996
	Sure		0.007698	5052	1.43266E-06	1/ 698004
total band EQ					3.32302E-06	1/ 300931

END
